

# Prince William County Glass Recycling Program

Multi-material recycling facilities do not handle glass containers very well and consequently most glass wind up in area landfills. For this reason, Prince William County has established a special *purple* glass-only recycling bin program:

- Prince William County Landfill  
*14811 Dumfries Rd., Manassas*
- Balls Ford Road Compost Facility  
*13000 Balls Ford Rd., Manassas*
- Dr. A.J. Ferlazzo Building  
*15941 Donald Curtis Dr., Woodbridge*
- McCoart Administration Building  
*Great Bridge / PW Parkway parking lot, Woodbridge*
- James S. Long Regional Park  
*4603 James Madison Hwy., Haymarket*

Glass placed in these *purple* recycling bins is sent to special glass processing facilities where the material is used to make new containers and other products. To participate, empty and rinse all glass containers and place in *purple bins*. You do not need to sort by color. Glass may also be placed in the regular trash in Prince William County to avoid contaminating recycling.

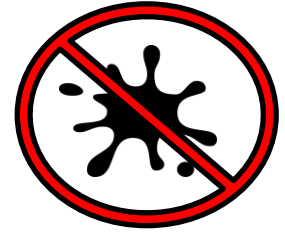

No plastic bags

No light bulbs

No other type of glass  
(dishes, cookware,  
window glass, etc.)

No food or liquid  
(empty & rinse)
