The Prince William Health District What You Should Know:

Getting The Flu Has Similar Symptoms of Covid-19, So Get The Flu Shot

Seasonal Influenza and COVID-19

- **Influenza (flu) and COVID-19 are both contagious respiratory illnesses**, but they are caused by different viruses.
- **It is possible to be infected with both a flu virus** and the virus that causes COVID-19 at the same time.
- **Because some symptoms of flu and COVID-19 are similar**, people may need to be tested to tell what virus is causing their illness.
- **Flu vaccination will reduce the burden of flu illnesses, hospitalizations, and deaths** on the health care system and help save healthcare resources for COVID-19 and other conditions.
- **The flu vaccine is recommended for anyone 6 months or older.**
- **It takes your body 2 weeks** to develop protection after you get the flu shot.

Community Vaccination Center and Manassas Mall

Appointments are highly recommended, walk-ins are welcomed.

Sign up for appointments at vase.vdh.virginia.gov for either the CVC or the Manassas Mall vaccine clinic

Protection From COVID-19: The CDC and VDH continue to recommend wearing your mask, washing your hands, social distancing, and avoiding large crowds as additional ways to continue to protect yourself from contracting COVID-19 and its variants.

Testing

- If you think you may have COVID-19, you can visit the [VDH website to locate COVID-19 testing sites](#) or visit
- <https://www.hhs.gov/coronavirus/community-based-testing-sites/index.html>
- You can reach out to your healthcare provider for COVID-19 testing. Pharmacies offer COVID-19 testing and sell over-the-counter home testing kits. <https://www.vdh.virginia.gov/coronavirus/covid-19-testing/walgreens-partnership/>
