

Spray-on Fireproofing

Issued by: *Eric M Mays, P. E.*

Building Official

Effective: April 07, 2011

Spray-on Fireproofing shall be specified based on the building having an unrestrained structural system.

The Structural Engineer of Record may submit for review structural documentation to substantiate that the building's structural system is restrained. Approval of the restrained structural documentation is required prior to proceeding with application of the spray-on fireproofing.
