

EXECUTIVE SUMMARY

CEDS Facility ID: 200000076954
 Tank Status: CURR IN USE
 Tank Status: CLS IN GRD
 Tank Status: REM FROM GRD
 Facility Id: 3001403

VA AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Quality's Aboveground Storage Tank Data Notification Information.

A review of the VA AST list, as provided by EDR, and dated 10/02/2023 has revealed that there are 4 VA AST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

VA ENG CONTROLS: A listing of sites with Engineering Controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

A review of the VA ENG CONTROLS list, as provided by EDR, and dated 09/05/2023 has revealed that there is 1 VA ENG CONTROLS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Facility ID: VRP00488

Lists of state and tribal voluntary cleanup sites

VA VCP: The Voluntary Remediation Program encourages owners of selected contaminated sites to take the initiative to conduct voluntary cleanups that meet state environmental standards. These sites are generally either open dumps or unpermitted solid waste disposal facilities. VRP sites can not be listed on the NPL, nor can they involve disposed RCRA hazardous wastes. The source of this data is the Department of Environmental Quality.

A review of the VA VCP list, as provided by EDR, and dated 09/05/2023 has revealed that there are 4 VA VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 17 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 18 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Comprehensive Environmental Data System (CEDS) is the Virginia Department of Environmental Quality's (DEQ) electronic data system for maintaining data on sources of pollutants in all media.

Waste Description: Mercury

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichloroethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Historic Generators:

Receive Date: 19890202
Handler Name: GENERAL DYNAMICS AMPHIBIOUS SYS
Federal Waste Generator Description: Small Quantity Generator
State District Owner: Va
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20010919
Handler Name: GENERAL DYNAMICS AMPHIBIOUS SYS
Federal Waste Generator Description: Small Quantity Generator
State District Owner: Va
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20121129
Handler Name: GENERAL DYNAMICS LAND SYSTEMS WOODBRIDGE TECHNICAL CENTER (WTC)
Federal Waste Generator Description: Conditionally Exempt Small Quantity Generator
State District Owner: Va
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20140926
Handler Name: GENERAL DYNAMICS LAND SYSTEMS WOODBRIDGE TECHNICAL CENTER (WTC)
Federal Waste Generator Description: Not a generator, verified
State District Owner: Va
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: Yes
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Alleged Violator's Address: 936 Annapolis Way plus other local locations Alleged Violator's City: Woodbridge Alleged Violator's State: Virginia Alleged Violator's Zip: 22191 Tip or Complaint: I have lived in Belmont Bay for 12 years and daily notice a white dust substance in the air and coating surfaces. My neighbors have also commented to me about this. Could this be airborne cement dust? My vacuum cleaner is always filled with this white dust and I vacuum 2x a week. On our building's cement structures there is also always an accumulation of airborne dirt which becomes embedded in the cement. We have had an increase in the amount of respiratory problems in our area. We have several Vulcan Material facilities and an Arban Carosi facility in close proximity to our area. When was the last EPA Air Quality report (including air particle matter) done for our area? When is the next one report due? Please send me the latest report. When was the last time Vulcan and Arban & Carosi were inspected for environmental issues? I am very concerned about the air quality in Belmont Bay and the surrounding areas. I have contacted Prince William County about this. Violation Still Occurring? Yes State DEP/DEQ/DEM Notified? No

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U069
Waste Description: 1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U154
Waste Description: Methanol (l) (Or) Methyl Alcohol (l)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

OCOQUAN HARBOUR MARINA (Continued)

U003681066

Discharge Volume: Not reported
 Unknown Discharge (Y/N): Not reported
 Site Name: ALLEGED COVANTA FUGITIVE EMISSIONS IMPACTING WOODBRIDGE MARINAS
 Closure Date: 08/28/2023
 Orig. Call Incident Description: Black soot has been habitually appearing at a marina. This is a massive concern as the Covanta incineration facility is only 3 miles away by road from a marina. This is a pressing environmental issue that multiple marinas in the locality can attest to. Our benchmark and TMDL parameters have been greatly exceeded, specifically copper, zinc, phosphorus, and our total nitrogen! The flue gas that is emitted from the Covanta facility is toxic and harmful. The components in the smoke generated after combustion include some trace metals such as mercury, cadmium, lead, molybdenum, chromium, nickel, copper. Not to mention it also contains O2, SOx, CO2, NOx, etc., but also acid gases such as HCl and HF, water vapor, and total hydrocarbons (THC). This is creating a detrimental impact on our reporting to stay in compliance with our VPDES Permit. The issue must be identified, rectified, and responsibility of this must be taken. Please contact me for further information if questions arise.

Original Call Material Description: Not reported
 Original Call Location Description: The location affected by the pollution incident noted is in Woodbridge, Virginia on the Occoquan River adjacent to Covanta. There are multiple marinas impacted by this.

Incident Ongoing at time of Call: Yes
 Agencies Notified (Y/N): Not reported
 Other Agencies: Not reported
 Permitted (Y/N): Yes
 Call Reported By Company Name: Not reported
 Call Property Owner Company Name: Not reported
 Call Property Owner Name: Not reported
 Site Summary: DEQ received an online pollution report alleging fugitive emissions from a permitted facility in Fairfax Co was impacting marinas in Prince William Co. Pollution response (PReP) referred the report to Air Compliance staff. Air Compliance staff conducted a site investigation at a marina and did not observe fugitive emissions impacts on surfaces at the marinas. No compliance issues observed on date of investigation. No additional DEQ action necessary.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110071193011

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Historic Generators:

Receive Date: 20130201
Handler Name: EXXON CO USA #24209
Federal Waste Generator Description: Not a generator, verified
State District Owner: Va
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: Yes
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 19890615
Handler Name: EXXON CO USA #24209
Federal Waste Generator Description: Conditionally Exempt Small Quantity Generator
State District Owner: Va
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Comprehensive Environmental Data System (CEDS) is the Virginia Department of Environmental Quality's (DEQ) electronic data system for maintaining data on sources of pollutants in all media.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Notes:	An application received on November 2, 2007. It was reviewed and determined that it was not complete. The application was placed on hold. The applicant and his attorney were notified by a letter dated November 7, 2007. The attorney submitted a letter to Director of NVRO and to the Director of Waste Div. in DEQ-CO. dated Dec. 6, 2007. In the letter, attorney requesting to use Department's process for Early Dispute Resolution regarding requirements of the consent order (investigation of the nature and Extent Study and RCRA Corrective Action). On December 18, VRP staff determined that the application is complete. It was assigned to Moe on Dec. 19, 2007. On December 20, 2007, two memos were sent to NVRO and DEQ-CO, OHWP requesting eligibility determination. VRP staff received an e-mail from NRO, indicating that the participant went through the process of Early Disput Resolution. It appears that the applicant needs to clean the site. VRP staff is waiting to hear from NRO and OHWP. 4/10/08 Eligibility denied due to consent order under RCRA 2014 - Site reapplied to VRP and becam enrolled in VRP as 646 on 7/9/15. GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Site Specific Assessments

To qualify for Brownfields Assessment, the site must meet the Federal definition of a Brownfields and should have contaminant issues that need to be addressed and a redevelopment plan supported by the local government and community. Virginia's Department of Environmental Quality performs brownfields assessments under a cooperative agreement with the U.S. Environmental Protection Agency at no cost to communities, property owners or, prospective purchasers. The assessment is an evaluation of environmental impacts caused by previous site uses similar to a Phase II Environmental Assessment.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SPILLS: Prep/Spills Database Listing

The Department of Environmental Quality's POLLUTION RESPONSE PROGRAM, known as PREP, provides for responses to air, water, and waste pollution incidents in order to protect human health and the environment. PREP staff often work to assist local emergency responders, other state agencies, federal agencies, and responsible parties, as may be needed, to manage pollution incidents. Oil spills, fish kills, and hazardous materials spills are examples of incidents that may involve the DEQ's PREP Program.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Number of Days to Update: 22	Next Scheduled EDR Contact: 03/11/2024
	Data Release Frequency: Annually

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 09/01/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/27/2023	Telephone: 202-564-8600

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/06/2023
Date Data Arrived at EDR: 11/07/2023
Date Made Active in Reports: 01/31/2024
Number of Days to Update: 85

Source: Department of Energy & Environmental Protection

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

UTM Y (Meters):	4281782.0
Elevation:	82 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50023284 FORT BELVOIR, VA
Version Date:	2022
Northwest Map:	50023287 OCCOQUAN, VA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
FORT BELVOIR	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Neabsco

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 53 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 4	Max: 5.5 Min: 4.5
2	7 inches	16 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 4	Max: 5.5 Min: 4.5

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Project #: 19-01549-019

USER QUESTIONNAIRE

MARINA WAY EXTENSION
PRINCE WILLIAM COUNTY, VA

(1.) *Environmental liens that are filed or recorded against the property (40 CFR 312.25).*

Did a search of *recorded land title records* (or judicial records where appropriate—see Note) identify any *environmental liens* filed or recorded against the *property* under federal, tribal, state or local law?

YES NO

Note—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that *environmental liens* and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for *environmental liens* and AULs.

YES NO

(2.) *Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.2(a)(1)(v) and vi).*

Did a search of *recorded land title records* (or judicial records where appropriate—see Note) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

YES NO

Note—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

YES NO

(3.) *Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).*

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

YES NO

(4.) *Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).*

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

YES NO Due to the early stage of project design, the appraisals for the properties have not been finalized.

(5.) *Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).*

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of *releases* or threatened *releases*? For example:

(a.) Do you know the past uses of the *property*?

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

(c.) Do you know of spills or other chemical *releases* that have taken place at the *property*?

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

Existing groundwater wells on the Gordon Plaza property have been located. We don't know the status of the wells at this time. The developer of this property is investigating these wells.

(6.) *The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).*

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

YES NO PWC will find out regarding the existing wells and what actions need to be carried out once the developer completes the investigation.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Johnson, Mirmiran & Thompson were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

**TECHNICAL DUE DILIGENCE REPORT
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Appendix I

Project #: 19-01549-019

LEO C. SNEAD, JR.

ENVIRONMENTAL LEAD

EDUCATION

BS/Biology

YEARS OF EXPERIENCE

41

REGISTRATIONS/CERTIFICATIONS

Rosgen Natural Channel Design, Levels I - IV

EXPERTISE | Mr. Snead's responsibilities have included managing environmental professionals and administrative staff. His technical disciplines managed include hazardous materials, cultural and historic resources, NEPA and state environmental documents, water quality and wetland permitting, endangered species and biological resources and environmental compliance monitoring. He has provided guidance and direction to staff and district personnel regarding interpretation of regulations and regulatory compliance, both at JMT and VDOT as an Environmental Manager. For the past 21 + years he has worked collaboratively to seek solutions and fostered a positive working relationship with other disciplines, working closely with consultant engineers and environmental consultants to delivery projects in a timely manner. He has encouraged use of technical tools (GPS and GIS mobile solutions) to increase efficiency and product delivery for projects ranging from maintenance activities to interstate widening projects. He has managed environmental responsibilities on several high-profile projects. His prior experience includes managing and supervising a statewide program focused on stream restoration, wetland mitigation and endangered species where he provided assistance and guidance to VDOT district staff on these issues as well as having responsibilities for quality assurance/quality control for all aspects of regulatory compliance, avoidance and minimization and environmental stewardship. He specializes in regulatory interpretation (primarily state and federal wetland/water quality regulations and endangered species), mitigation design, remote sensing and problem area and disturbed area wetland delineation.

PROJECT EXPERIENCE | **VDOT, Central Office Natural Resources Program Manager.** Mr. Snead worked for 17 years in VDOT Central Office as the statewide Natural Resources lead for threatened and endangered species (as well as wetlands, streams and other protected species). In this position, he regularly coordinated with USFWS, NOAA-National Marine Fisheries Service (NOAA-NMFS), Virginia Department of Agriculture and Consumer Services (VDACS), DCR-Division of Natural Heritage (DCR-DNH) and Virginia Department of Wildlife Resources (VDWR) regarding state and federally protected species. He was responsible for coordinating agency

response to listing of the Northern long-eared bat and coordinated frequently with USFWS throughout his tenure there to ensure that VDOT staff were aware of what seemed to be constantly changing conditions and requirements for this species. He developed agreements with VDWR regarding practices to minimize impacts of transportation projects on two state protected bat species, working closely with the VDWR bat biologist. He assisted in procuring bat and other species surveys for transportation projects statewide and often worked closely with the Bristol District Environmental Manager regarding threatened and endangered species concerns including development of biological assessments and coordination with USFWS/VDWR regarding agency concerns and final B.O.s, giving him the necessary experience to work closely with VDOT, USFWS, VDWR and others to ensure any work (including visual inspection and other non-destructive testing) is conducted in accord with any Terms and Conditions imposed by USFWS or VDWR. He worked with the Federal Highways Administration (FHWA) and USACE to craft letters identifying VDOT as their designated non-federal entity for informal consultation with both USFWS and NOAA-NMFS on endangered species concerns. This designation, which is still in effect, allows VDOT to coordinate directly with these resources agencies on Not Likely to Adversely Affect Determinations, making this process more efficient.

VDOT, I-95 Rappahannock River Crossings, Fredericksburg, VA. VDOT District Environmental Manager. JMT is the lead designer for this design-build project to add six miles of three new southbound general-purpose lanes in a notoriously congested area of Northern Virginia near the City of Fredericksburg. JMT successfully designed and permitted this complex Design Build project with significant environmental constraints including NRHP site, and trail (Section 4[f]), secured Individual Section 404 and VWP permits, completed Final Noise Study/barrier design, endangered mussel surveys, NLEB 4(d) Programmatic Self-certification. Complex traffic operations and complex MOT design services. Mr. Snead was the lead environmental reviewer for the VDOT District and was involved

in multiple phases of project design and construction, reviewing and commenting on project work packages, insuring compliance with NEPA, 404/VWPP permits/Section 7 Endangered Species Act/Section 106 requirements from 2017 to 2021. He provided guidance on interpretation of environmental commitments and VDOT interpretation of regulatory intent and worked collaboratively with VDOT staff, the P3 vendor and DB contractors to meet requirements. In addition, he worked closely with sub-consultants and the VDOT Construction Manager to develop a project-wide UAV aerial imagery/GIS application to assist staff in tracking and resolving reportable discharges.

DB Northstar Boulevard Shreveport Drive to Route 50. Senior Environmental Specialist. The project is in the Arcola section of Loudoun County and will extend Northstar Boulevard approximately 1.4 miles from Route 50 to approximately 0.18 miles South of Shreveport Drive, connecting to a portion of Northstar Boulevard which is currently under construction by a private developer. JMT is also the lead for environmental services on this project. Mr. Snead is responsible for QA/QC and discipline-level management of permitting, NEPA, T&E and HazMat issues on this project.

Prince William County, Route 1 Fraley Boulevard Widening, Prince William, VA. Senior Environmental Specialist. JMT is currently providing the engineering support services for the Fraley Boulevard Widening Project in Prince William County. This Project will widen about two miles of Fraley Boulevard (Route 1, primarily in the Town of Dumfries) to three lanes in each direction between Bradys Hill Road and Route 234 (Dumfries Road). The proposed project will be designed to relocate and reconnect existing water and wastewater facilities within the roadway project area. Current relocations include over 8,000 LF of various diameter waterlines, over 16,000 LF of sanitary gravity collection sewer, 190 sanitary manholes, 1,000 of sanitary forcemain and associated appurtenances. Mr. Snead manages staff responsible for wetland/ stream delineation and permitting, hazardous materials (Phase I ESA investigations) and endangered species reviews.

DWR Eastern Shore ESAs, Department of Wildlife Resources, Accomack and Northampton Counties, VA – Project Manager. JMT teamed with Bay Environmental to conduct 147 environmental site assessments on the Eastern Shore of VA on an accelerated timeline. He worked with JMT IT staff to develop a Survey123 app to complete 76 Phase I Environmental Site Assessments, using ASTM E-2247 for rural and forestal lands; managed a team of field staff to conduct desktop reviews, historical sources review and site visits to identify recognized environmental concerns on an accelerated project schedule and provided oversight and QA/QC review of the final document. Work required regular review of project status, % completion and financials, communication of technical needs to IT staff and an understanding of the due diligence requirements associated with property evaluations.

VDOT, Fredericksburg District Environmental Section Management, Fredericksburg, VA - VDOT District Environmental Manager. Full time position responsible for managing 11 staff covering five disciplines (water quality permitting, hazardous materials, cultural/historical resources, NEPA/Environmental documents and threatened/endangered species). Managed and supervised the development of the Environmental Compliance program, providing regular input on the statewide development of this program since 2017. Assigned responsibilities for Environmental Compliance Inspectors (ECIs) and insured that appropriate special provisions, permit requirements and regulatory requirements were incorporated into construction documents; coordinated with peers statewide to insure consistency across the districts in the application of this developing program; provided staff guidance and technical advice regarding implementation of the ECI program on complex issues and made decisions regarding resolution or elevation to Central Office. Required a sound understanding of construction constraints, complex environmental issues and regulatory requirements and strong interpersonal skills.

VDOT, Fredericksburg Extension, Fredericksburg, VA - VDOT District Environmental Manager. Fall 2017 through Summer 2021, approximately 20 hours/week for the duration. Led district environmental review, NEPA compliance and permit compliance monitoring during PE and construction phases insuring compliance with NEPA, 404/VWPP permits/Section 7 Endangered Species Act/Section 106 requirements from 2017 to 2021; provided guidance on interpretation of environmental commitments and VDOT interpretation of regulatory intent; worked collaboratively with VDOT staff, P3 vendor and DB contractors to meet requirements. Worked closely with sub-consultants and VDOT Construction Manager to develop project-wide UAV aerial imagery/GIS application to assist staff in tracking and resolving reportable discharges.

VDOT, Chatham Bridge Rehabilitation, Fredericksburg/Stafford County, VA - VDOT District Environmental Manager. Spring 2019 through Summer 2021. Championed environmental requirements for an accelerated project design and construction project involving deck/pier rehabilitation across the Rappahannock River. Project schedule was accelerated approximately one year to reduce impact to the travelling public. Worked collaboratively with Bridge and Construction Divisions to successfully negotiate agency approvals of a relaxation of anadromous fish TOYR during the first year of construction (resulting in less temporal impact to anadromous fish spawning, due to the accelerated schedule), coordinated Section 7 consultation for the federally endangered Atlantic sturgeon, contracted mussel surveys and coordinated compensation measures for potential impacts to a colony of green floater mussels (*Lasmigona subviridis*), resulting in a two-year mussel propagation and reintroduction program with the Department of Wildlife Resources for this

species. Managed staff acquisition of the first migratory bird take permit in Virginia to allow construction during the TOYR for nesting cliff swallows, resulting in the successful removal and relocation of approximately 100 cliff swallow chicks and eggs.

VDOT, NB I-95 Widening, Fredericksburg/Stafford County, VA - *VDOT District Environmental Manager*. Lead environmental reviewer for the VDOT District. Provided input during NEPA reevaluations, design and construction phases of I-95 widening project from Route 3 to north of Exit 133. Prior to selection of a DB contractor, worked closely with consultant to obtain permits for VDOT for work that needed to be accelerated to avoid conflicts with another project under construction in the same area. Commented regularly on design, permitting applications, T&E review; participated in monthly progress meetings and insured environmental compliance reviews were conducted on a regular basis.

Chesterfield County, Otterdale Road Bridge Replacements, Chesterfield, VA – *Environmental Manager*. Conducted QA/QC reviews on wetland delineation report revision, permit applications, mitigation needs and Phase I ESA for two of three bridge replacement projects in Chesterfield County, VA. Coordinated with hydraulics engineer regarding H&HA analysis and implications for project impacts. Involved in discussions regarding archaeological sites within project limits, utility line permitting and other, environmentally related issues. Will continue to provide input and QA/QC review of deliverables, direction to staff as needed.

CARTER TEAGUE, PWS

HAZARDOUS MATERIALS/WETLAND / STREAMS / FLOODPLAINS / THREATENED, ENDANGERED, SPECIAL STATUS SPECIES / WILDLIFE HABITAT

EDUCATION

BS/Natural Resources

YEARS OF EXPERIENCE

23

REGISTRATIONS/CERTIFICATIONS

Professional Wetland Scientist

EXPERTISE

Mr. Teague has over 23 years of experience in provided environmental services for large transportation projects throughout the United States. Mr. Teague has significant experience with water/stream/wetland related permitting and NEPA studies on transportation projects including wetland delineation, stream assessment and restoration, wetland mitigation, endangered species, and natural resource studies. He also has significant experience with water quality studies and water quality compliance, stream assessments to determine perennial flow, stream assessments using the Unified Stream Methodology to determine compensation for stream impacts.

PROJECT EXPERIENCE

VDOT, I-95 SB CD Lanes Rappahannock River Crossing (Design-Build), Stafford and Spotsylvania Counties, VA. Environmental Scientist. Mr. Teague managed the environmental services for the 6.5-mile interstate project, which included the Phase I ESA, the Spill Prevention Control and Countermeasure Plan, SWPPP/VPDES General Permit, and the Environmental Management Plan. Project tasks also included Section 404/401 Permits, a Virginia stormwater management permit, environmental and SWPPP compliance monitoring during the 2.5 year construction, stormwater and E&S/environmental compliance inspections. Also managed the environmental permitting for the project which required Individual permits from the USACE and DEQ and a SBP from the VMRC.

Virginia Department of Transportation/Federal Highways Administration, Eastern Federal Lands Department, Fairfax County Parkway Extension Phases II/III/IV (DB), Fairfax County, VA. Project Scientist. Mr. Teague was responsible for the environmental studies and permitting for a 2.4 mile extension of Fairfax County Parkway from the Franconia-Springfield Interchange to Interstate 95. The project is a \$90 million dollar Design Build project that creates a new interchange for Ft Belvoir, which is experiencing significant expansion because of BRAC related projects. This was a federally funded project, with significant challenges due to several RCRA sites with significant environmental contamination at Ft Belvoir that the parkway crossed, due to the presence of a small whorled pogonia plant (Federally threatened) in the project corridor, and due to the wetland and stream impacts which required an Individual permit from the Virginia DEQ and USACE. Prepared the required permit applications and completed the construction compliance monitoring during the life of the construction activities.

VDOT, Odd Fellows Road Interchange (Design-Build), Lynchburg, VA. Environmental Task Manager. Mr. Teague provided technical and regulatory services that included Section 404 and WPP Individual Permits, WOUS delineation and securing a J.D., wetland and stream compensation, and monitoring plan, a Virginia stormwater management permit and the stormwater pollution prevention plan for the construction. Mr. Teague completed the environmental compliance monitoring during construction including wetland, stormwater and E&S monitoring and inspections, and compliance with NEPA commitments, and a Phase I environmental site assessment and hazardous materials management.

Loudoun County, DB Northstar Boulevard Shreveport Drive to Route 50. Environmental Scientist. Mr. Teague was the environmental task lead in the preparation of the NEPA Re-evaluation, section 404/401 permitting, Phase I ESA, and threatened and endangered species coordination. JMT is the lead designer on the Shirley Contracting Company, LLC's team for this design-build project in Loudoun County, VA. The project extends Northstar Blvd. north for approximately 1.4 miles from Route 50, and will be constructed as a 4-lane divided roadway with provisions for future widening to 6-lanes. A new 2-span, 270-ft long, haunched steel-plate girder bridge carries Northstar Blvd. over Broad Run. This project includes the design and construction of Northstar Boulevard as a four-lane divided roadway with shared use paths, a new bridge over Broad Run, and improvements to adjacent roadways.

Patrick County, Route 58 – Lovers Leap. Senior Environmental Scientist. Mr. Carter was responsible for environmental compliance during the construction of the project. Review included Section 404/401 permits, environmental studies, Phase 1 Environmental Site Assessments, and analysis of habitat for threatened and endangered species. Monthly and as needed compliance site inspections conducted for VDOT.

City of Richmond, Commerce Road Improvements and Bridge Replacement. Senior Environmental Scientist. Mr. Teague was responsible for the NEPA and environmental studies for the commerce Road project in Richmond, Virginia. The project was intended to provide road improvements along the industrial section of Commerce Road. The company's role was to prepare the hazardous materials, air quality, cultural resource, and natural resource technical reports and the Categorical Exclusion for National Environmental Policy Act (NEPA) compliance. Carter was responsible for the wetland delineation and environmental permitting for impacts to wetlands and streams and assisted with the NEPA document (Categorical Exclusion).

ASHLEY D. WILKINS

ENVIRONMENTAL SCIENTIST

EDUCATION

BS/Environmental Studies

YEARS OF EXPERIENCE

5

REGISTRATIONS/CERTIFICATIONS

VA DEQ Erosion & Sediment Control Inspector (Provisional)

NC DEQ CDBG-I Certification

EXPERTISE | Ms. Wilkins's responsibilities have included preparation of environmental permit applications and environmental impact documentation, including NEPA documents; conducting natural resource surveys including wetland delineations, stream assessments, and vegetation surveys in Virginia, Maryland, and North Carolina; researching, analysis, and development of GIS data sets in support of transportation and water resources infrastructure projects; production of various mapping and exhibits for project deliverables and to facilitate preparation of environmental reports and project permits; assisting with water resources report production including SWPPP and stormwater management reports; and assisting with preparation of hazardous materials documentation including Phase I ESAs. For the past 5 years she has worked collaboratively to seek solutions and to foster a positive working relationship with other disciplines, working closely with consultant engineers and environmental consultants to deliver projects in a timely manner. She incorporates the use of technical tools (GPS and GIS mobile solutions) to increase efficiency and product delivery for projects ranging from delineations to water sampling efforts. She has assisted with environmental responsibilities on several high-profile projects. Her prior experience includes researching and preparing a report on urban greening and low impact development practices by evaluating case studies, literature, and state agency guidelines, the development of a greening map to assist in identifying potential sites, and assisting with the production of a web mapping application to facilitate community engagement in support of an EPA Small Urban Waters Grant Project with Virginia Commonwealth University (VCU); and development of a spatial dataset of water quality monitoring priority areas to assist in the development of monitoring plans, communicate monitoring needs, and aid in the prioritization of the 2017 Citizen Monitoring Grant Awards as a GIS Intern at Virginia Department of Environmental Quality (VA DEQ).

PROJECT EXPERIENCE | JMT, Chesterfield County Public School Water Quality Sampling, Chesterfield, VA.

Environmental Scientist. Ms. Wilkins organized and conducted

drinking multiple water sampling efforts for lead and copper at Chesterfield County, VA schools, which required working around school hours and maintaining close communication with the client and each school during the process. She analyzed lab results and prepared reports for each school.

JMT, I-95 Rappahannock River Crossings, Fredericksburg, VA.

Environmental Scientist. Ms. Wilkins assisted in the preparation of the permit application and mapping, and conducts environmental compliance monitoring during project construction.

Chesterfield County, Otterdale Road Bridge Replacements, Chesterfield, VA – Environmental Scientist.

Ms. Wilkins assisted with the wetland delineation, delineation report, and permit applications for three bridge replacement projects in Chesterfield County, VA. She assisted with the production of a set of graphic displays to demonstrate the potential for flooding at each crossing and to assist in the evaluation of potential alternatives.

National Parks Service, Blue Ridge Parkway Bridge Replacements, Ashe, NC – Environmental Scientist.

Ms. Wilkins assisted with the wetland delineation and natural resources surveys and reports for four bridge replacement projects in Western North Carolina.

Nice Bridge GEC Services, Maryland Transportation Authority (MDTA), Newburg, Charles County, Maryland – Environmental Scientist.

Ms. Wilkins assisted with development of NEPA reevaluation documents, pertinent state/federal permits for impacts to wetlands/streams, participated as a field staff member on delineations and natural resource studies, prepared graphics and assisted in document preparation.

Appendix H – Indirect and Cumulative Effects Analysis

The following is the Indirect and Cumulative Analysis (ICE) that was prepared for the Marina Way Extension project. This document represents the Note to File and supports the ICE summary provided in the Environmental Assessment (EA). This analysis was prepared per the guidelines identified in VDOT Environmental Division's Instructional and Informational Memorandum for Indirect and Cumulative Analysis (IIM-ED-715.1) and utilizing the outline presented in the Skiffes Creek ICE Technical Report.

INDIRECT EFFECTS

Indirect effects are those that are caused by the proposed action but occur later in time or farther in distance than the direct impacts. The most common indirect effects associated with highway projects have to do with induced development, that is, development and the impacts of such development that would not otherwise occur if the project were not constructed.

Step 1: Scoping. Prince William County, in coordination with VDOT and FHWA, has coordinated with local, state, and federal agencies throughout the Marina Way Extension environmental review process. Additional details can be found in Section 4 - Coordination and Comments of the EA. This step also included reviewing the planning documents prepared by Prince William County (County). The documents included the 2019 North Woodbridge Small Area Plan which included the Illustrative Plan and a Mobility Plan, the 2005 Master Zoning Plan, and Transportation Planning Board's (TPB) Visualize 2045.

Step 2: Identify Study Area Direction and Goals. The project location shown in was the initial location used to identify boundaries of the resource-specific study areas described below. Each resource-specific study area includes the project's study area and additional lands that contain resources that are connected to the area of direct effects of the proposed project. The boundaries of the resource-specific study areas are shown in **Figure 1** and intend to be large enough to encompass regional resources of concern that were identified during the scoping phase. The following are descriptions of the resource-specific study area used for this analysis:

- **Induced Growth:** This study area includes a one-mile buffer from the proposed Marina Way extension which includes its improvements at the Marina Way and Annapolis Way, and Marina Way at Route 123 intersections. The study area also includes the major feeder roads in the area including I-95, Route 123, Horner Road, and Route 1. A 1,000 ft buffer was used along these roads as well. Please refer to **Figure 1**.
- **Social and Economic Resources, and Parks, Recreation and Open Space Easements:** This study area is defined by the North Woodbridge Small Area Plan. The study area includes the residential communities, businesses, and industrial areas within North Woodbridge, Virginia (refer to **Figures 2 and 3**). This study area accounts for the census blocks that encompass the project's study area as well as the Induced Growth study area.
- **Natural Resources:** The study area for indirect and cumulative effects to natural resources is the Occoquan Bay-Potomac River and Belmont Bay-Occoquan River 12-digit watersheds (refer to **Figure 4**). This study area includes residential and commercial areas as well as multiple state parks and wildlife refuges that provide habitat for wildlife which could potentially be indirectly affected by the Preferred Alternative.

Figure 1 – ICE Study Areas

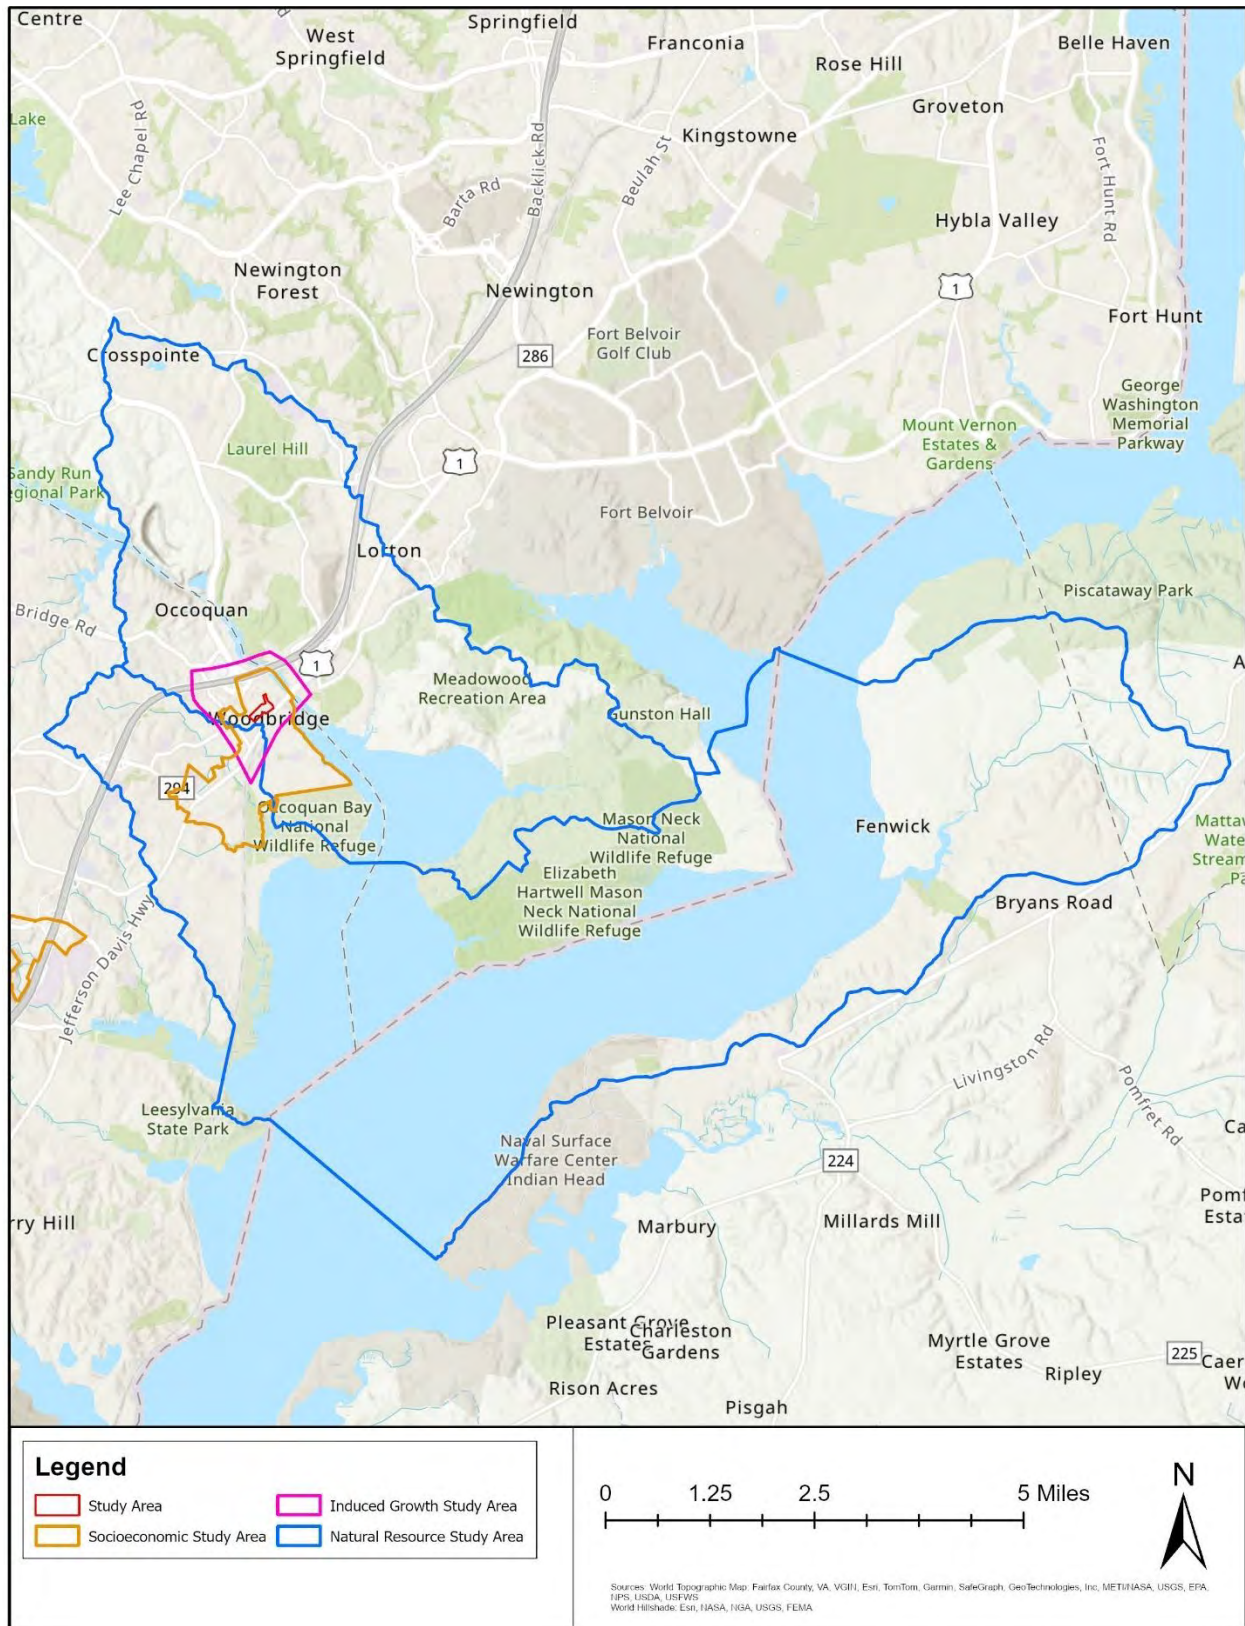

Figure 2 – Socioeconomic Study Area (Residential and Businesses)

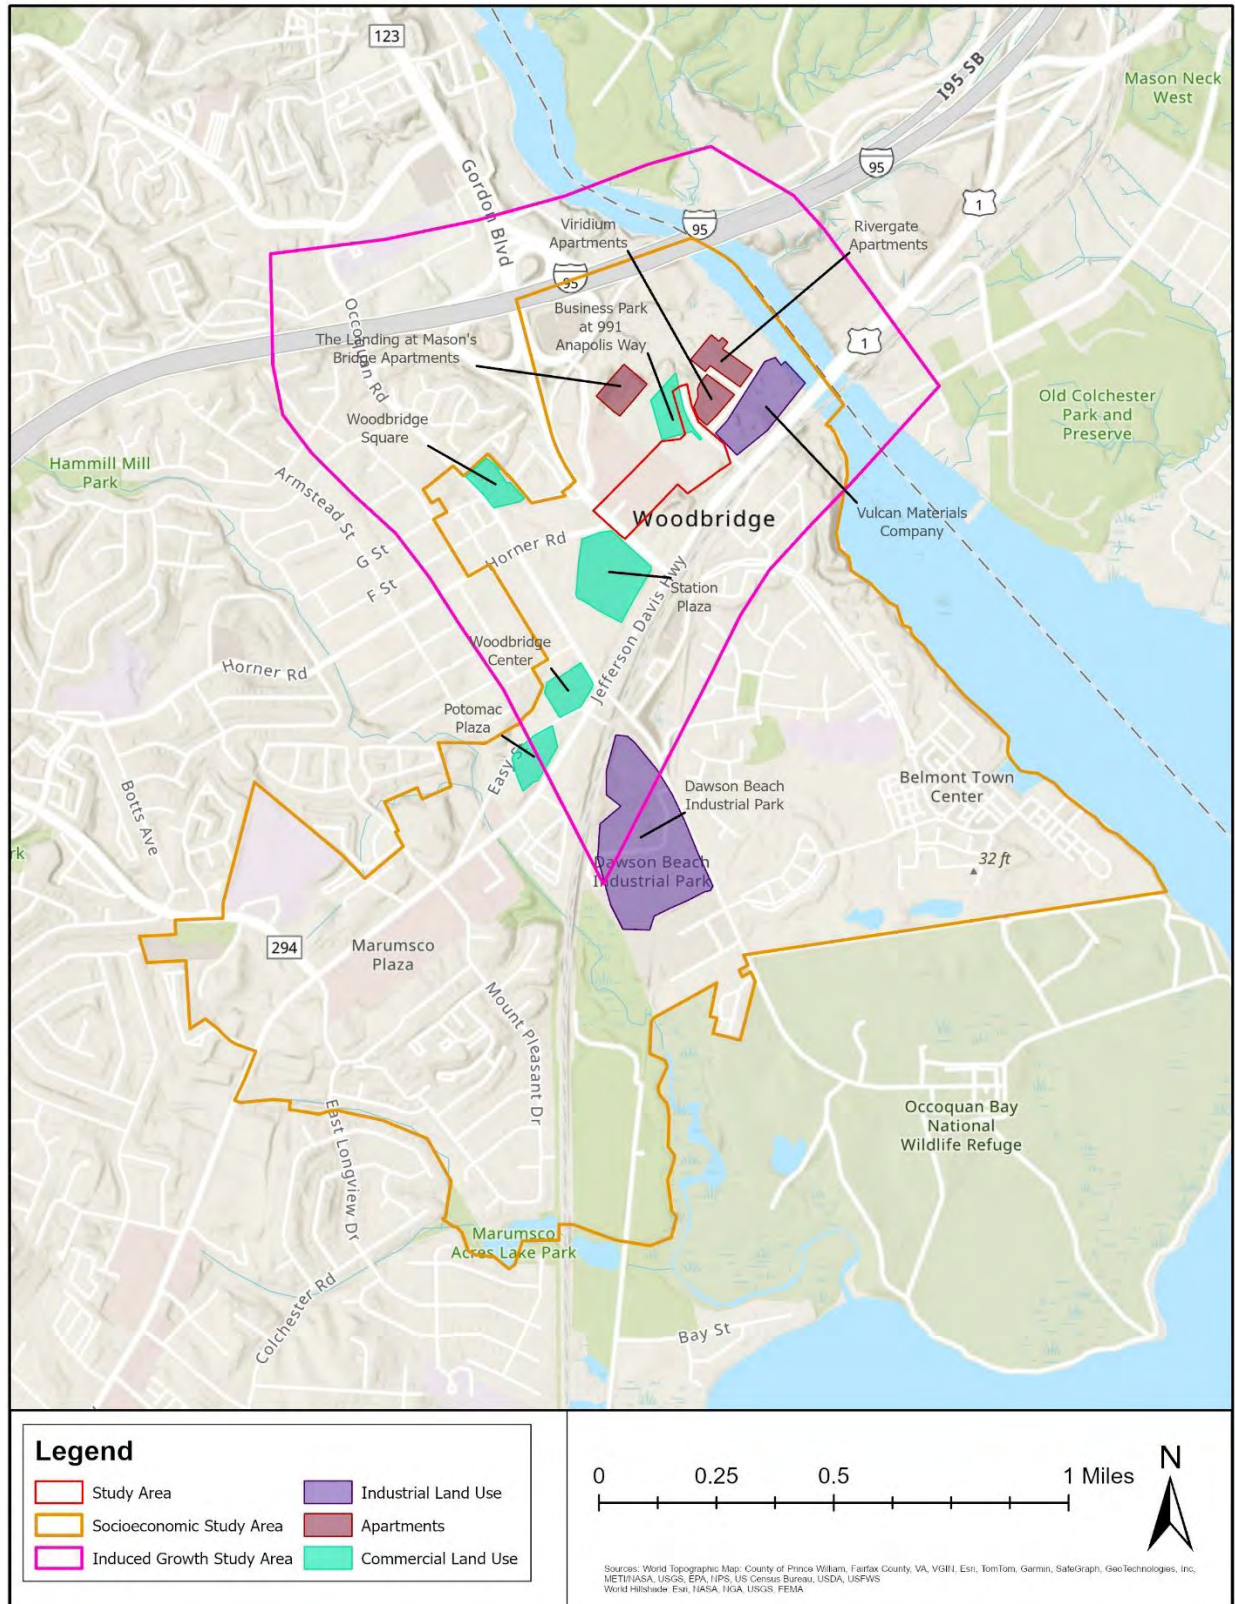

Figure 3 – Socioeconomic Study Area (Community Resources)

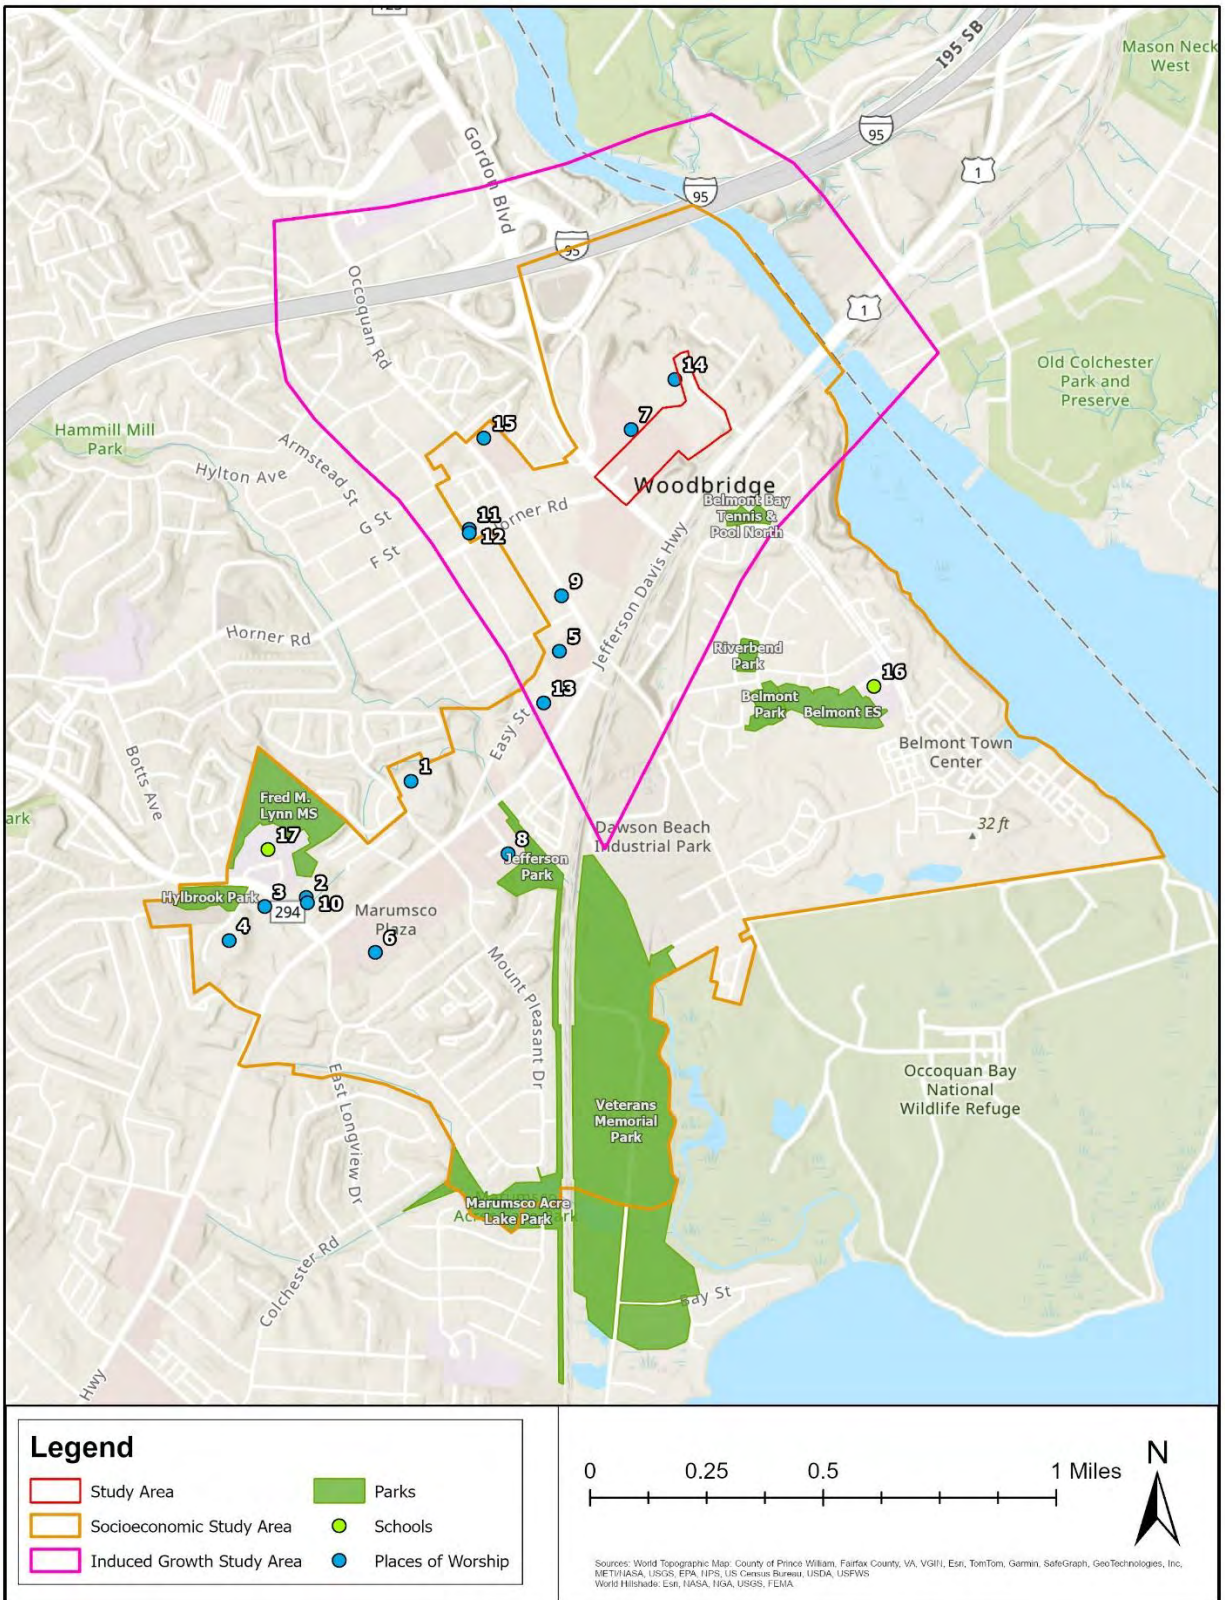

Figure 4 – Natural Resources Study Area (Forest Cover)

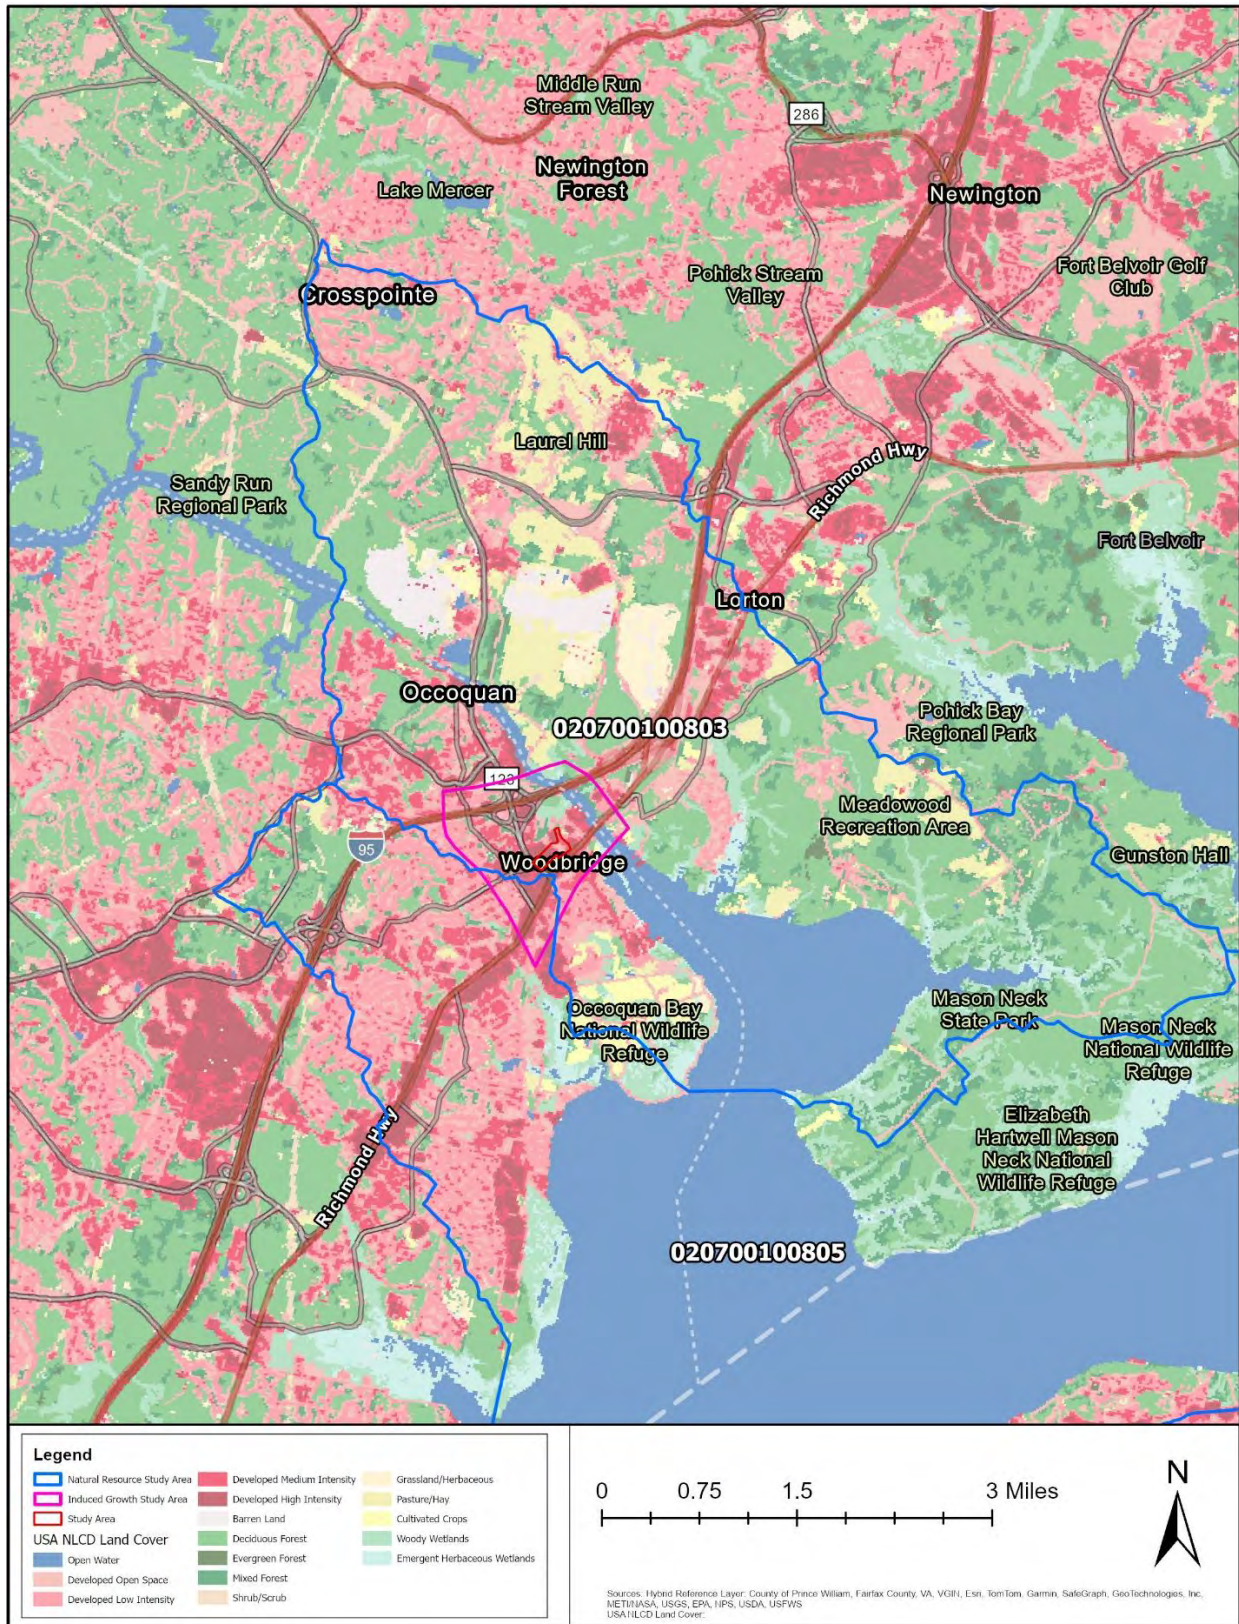

Figure 5 – Natural Resources Study Area (Water Resources)

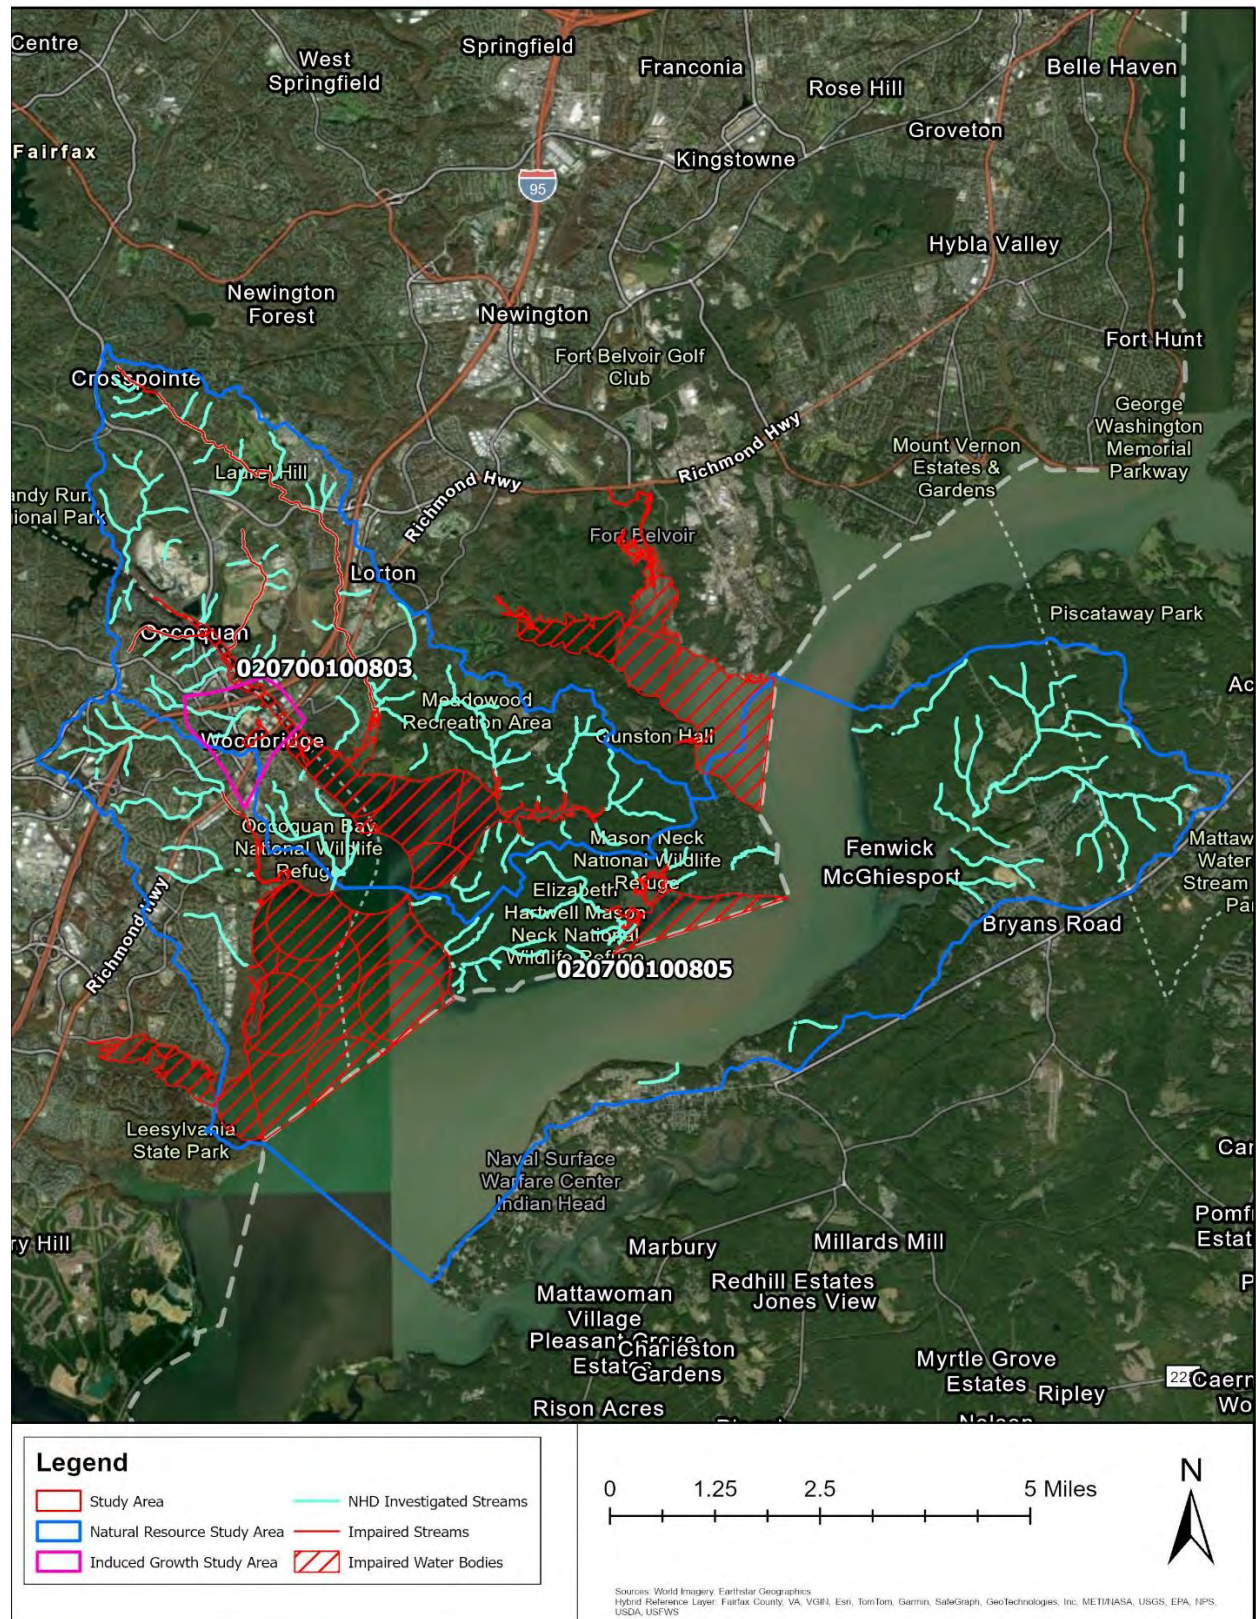

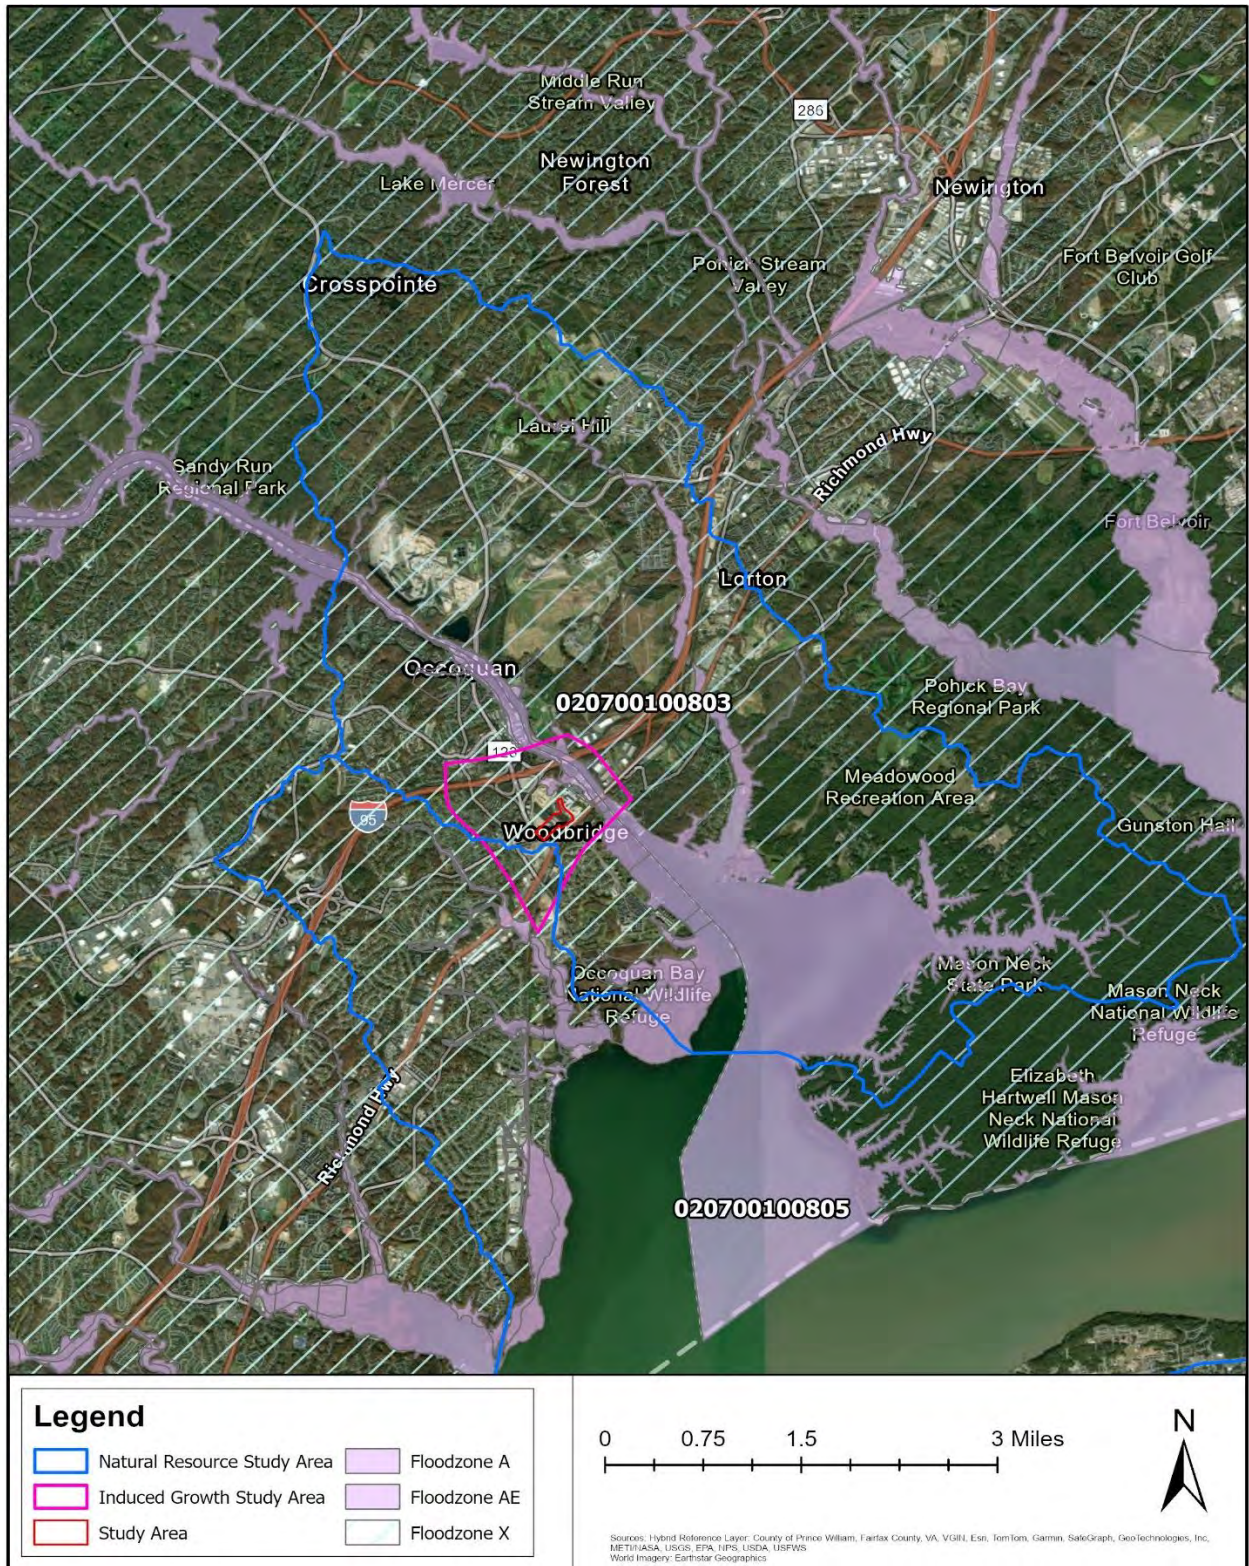

Figure 5 – Natural Resources Study Area (Floodplains)

The study areas for the socioeconomic and natural resources encompass the North Woodbridge area as well as a portion of Woodbridge and a portion of the city of Lorton in Fairfax County. A review of historical topographic and aerial maps provided by the US Geological Service (USGS) reveals that the first structures in the Woodbridge and Lorton area occurred in the 1890's. During this time, Routes 123 and 1 existed and serviced the area. Between 1890 and 1920, the Richmond to Fredericksburg railroad was constructed. By 1944, residential development expanded along the major thoroughfares including Route 1 and portions of Route 123. In 1957, Interstate-95 (I-95) opened and residential and commercial development in the area began to grow. By 1965, Marina Way was constructed and mining at the Occoquan River was occurring. Also, businesses began to move into the area now known as Gordon Plaza. By the 1990's, the area had become built-out and urbanized as it is today.

Prince William County has experienced significant growth since 1970 and, according to the Weldon Cooper Center at the University of Virginia, will continue to increase through the year 2050. (Weldon, 2014) The population in the area has grown by over 100% between 1990 and 2020. In addition to growth in population, employment in the North Woodbridge area is anticipated to increase at a similar rate. (Census, 2023)

The development of North Woodbridge is guided by the North Woodbridge Small Area Plan which is part of the County's Comprehensive Plan. North Woodbridge is part of the Washington D.C. Metropolitan area, located approximately 20 miles southwest of the city. The revival of the North Woodbridge area is centered around the development of a town center which would include Marina Way Extension as a main street. The town center would allow for mixed-use development within a small area and would promote walkability and bikeability. The Plan asserts that the North Woodbridge Town Center should include a network of streets that provides an extension of Horner Road across Route 123 to intersect Annapolis Way which provides access to the Occoquan Harbor Marina, as well as the Annapolis Way extension as it is already planned (Prince William County, 2019).

Step 3: Identify Notable Features in the Study Area. The objective of this step is to identify specific environmental issues within the study areas against which the proposed project may be assessed. This is accomplished through conducting an inventory of notable features for each resource of concern. For the purposes of this analysis, all resources included for evaluation were identified as notable features, for which indirect effects were considered.

In the Socioeconomic resources study area, notable features are included in Table 1 and Figures 2 and 3, and, Section 3.2 of the EA for additional information about these resources and communities.

Table 1- Notable Features in the Socioeconomic Resources ICE Study Area

Map ID	Facility	Facility Type

13	Ministerio Voz Profetica a Las Naciones	Place of Worship
14	Royalhouse Chapel International	Place of Worship
15	Woodbridge Faith Center	Place of Worship
16	Belmont Elementary School	School
17	Fred M Lynn Middle School	School

The Natural resources study area includes tracts of forest that are potential threatened and endangered species habitat and the Occoquan River. The Occoquan River has been identified as an impaired waters and as potential habitat for the Atlantic sturgeon. There are also perennial and intermittent streams that traverse the study area and flow into the Occoquan and Potomac rivers. Forests throughout the area offer potential habitat for the Northern long eared bat, the Tri color bat, and Small whorled pogonia. Please refer to Figures 4 and 5 and Section 3.7 of the EA for additional information about these species.

Step 4: Identify Impact Causing Activities of the Proposed Alternatives. To assess whether there is a potential for indirect effects, this step identifies any impact-causing activities of the alternatives to be compared with the goals and trends identified in Step 2 and the notable features identified in Step 3. Earthwork (clearing, excavation, and filling); landscaping and erosion control; changes in traffic patterns; and changes in access are all project impact-causing activities that are anticipated with this project. These activities have been considered in the direct effect analysis for each resource in Sections 3 of the EA. Indirect effects have the potential to be triggered by the direct effects of the proposed project through encroachment and alteration of the environment farther in distance or at a later point in time. Indirect effects can also occur because of induced changes in land use patterns, population density, or growth rate that would otherwise not be expected without the execution of a proposed project. General circumstances that impact the likelihood of induced development within an area undergoing urbanization include:

- Accessibility
- Extent of existing transportation infrastructure
- Attractiveness of the location
- Availability of land
- Condition of the regional economy
- Availability of utilities
- Local political/regulatory conditions
- Vacancy rates in the area
- Land use controls

There are no direct effects associated with the No Build Alternative. The Preferred Alternative would impact 1.1 acres of forest which is suitable wildlife habitat which includes the endangered Northern long eared bat and Tri color bat habitat. The Preferred Alternative would also require partial ROW acquisition from six parcels for a total of 2.5 acres.

Step 5: Identify Indirect Effects for Analysis. The objective of this step is to evaluate whether notable features identified in Step 3 would be indirectly affected by the Preferred Alternative, taking into consideration the impact-causing activities and direct effects from Step 4. The following subjects were determined to potentially experience indirect effects from the Preferred Alternative and were considered for potential indirect effects in Step 6:

- Induced Growth
- Socioeconomics and Economic Resources
- Wildlife and Threatened and Endangered Species

The influence of roadway projects on growth and development depends in part upon the extent and accessibility of the existing transportation infrastructure. Factors for growth and development include rate of growth and urbanization in the region, the project's accessibility improvements, economic conditions, and the availability of land for development.

The project is located between I-95 and Richmond Highway (US Route 1) and adjacent to Gordon Boulevard (Route 123). Route 1 intersects with Annapolis Way and Route 123 and is considered a major thoroughfare that serves the eastern portions of Prince William and Fairfax Counties. To access I-95/Route 123 Commuter Lot, VRE Station, and destinations north and south of the study area vehicles must utilize Route 1. The existing Marina Way serves as the only connection to a marina at Occoquan Harbor, Vulcan Materials Company Woodbridge sand yard, and the Rivergate apartments. The extension of Marina Way would reduce congestion on surrounding roads and provide pedestrian access to the proposed North Woodbridge Town Center. These improvements represent incremental improvements to access within an area that is already planned to be developed. Therefore, the potential for the project to induce growth due to increased accessibility is anticipated to be low.

The attractiveness of a location and the strength of the regional economy are positively correlated with the potential for growth in that area. Predictions for continued population growth in Prince William County (see Section 3.2 of the EA) support a high level of attractiveness and a strong economy. A portion of the anticipated future employment in North Woodbridge is centered around the development of the North Woodbridge Town Center (Prince William County, 2019). The Preferred Alternative would reduce congestion and improve pedestrian access and mobility in and around the Town Center.

Population growth and development rate within a locality depends upon land availability and local political conditions as well as land use controls. Most of North Woodbridge is zoned for general commercial development which allows for a wide range of commercial uses. Also, a sizable portion of the North Woodbridge area is within the Redevelopment Overlay District. The purpose of this district is to promote redevelopment and the economic viability of older commercial neighborhoods that have experienced economic decline (Prince William County, 2019).

In conclusion, it is not anticipated that the Preferred Alternative would encourage any changes in land use that are not already expected. The extension of Marina Way has been identified in the transportation section of the North Woodbridge Small Area Plan which makes the Preferred Alternative consistent with the future condition of land use that is already anticipated and planned for by Prince William County.

Construction of the Preferred Alternative would cause direct impacts from tree removal to potential wildlife habitat which includes suitable threatened and endangered species habitat. The construction of the new roadway may indirectly impact habitat. The new roadway would introduce a new noise source, potential add to pollution, and alter foraging behavior. The improved accessibility to the area slightly increases potential development to the area. This development may directly impact potential threatened and endangered species habitat during construction.

Step 6: Analyze Indirect Effects and Evaluate Analysis Results.

Social and Economic Resources

Under the No Build Alternative, the population and employment in the area is expected to continue to grow. This growth will continue to put pressure on the traffic congestion of the roadways throughout the area. Also, accessibility to local businesses and residential communities would continue to be limited in the North Woodbridge area. With the increase in traffic congestion along the major feeder roads to the area, the area would experience proximity impacts to air quality and noise. Also, the lack of direct access to the proposed North Woodbridge Town Center would require drivers to access the shopping center from Route 123 and Route 1. The increase in traffic movements along congested roadways can lead to safety issues for the travelers.

The Preferred Alternative alignment would allow for the County to construct its planned, direct access to the North Woodbridge Town Center. The proposed roadway will carry travelers directly to the businesses and avoid using the congested Route 1 and Route 123 to access the town center. This would remove future congestion from the Route 1 and 123 corridors which could improve travel reliability, safety, and emergency vehicle response times. By the time the Preferred Alternative is constructed, local businesses at the Gordon Plaza would have relocated to accommodate the roadway. The business relocations are separate from this project and have already be planned. Also, the County's North Woodbridge Small Area Plan has identified the extension of Marina Way as a priority for the economic growth of the area. The County's future land use and zoning plans are designed to accept this new roadway.

The Preferred Alternative is not expected to cause changes to current and future land use and zoning designations. Also, the County has already defined areas in North Woodbridge for growth and development. With no induced growth anticipated for the Preferred Alternative, it would not have indirect effects on socioeconomic resources.

Wildlife and Threatened and Endangered Species

Wildlife habitat within the study area is fragmented and previously disturbed by Route 1 (Richmond Highway), other roadways, and commercial and residential development. The No Build Alternative would not result in further fragmentation of wildlife habitats however, present and planned future

development and transportation projects would continue to reduce habitat areas. Under the No Build Alternative, wildlife, including threatened and endangered species, that occupy nearby forested habitats would continue to experience disturbance from degradation of habitat from soil erosion, traffic noise, collision with vehicles, and introduction of invasive plants.

The Preferred Alternative would require the removal of trees from a forested area within the proposed alignment of the roadway. These forest communities may provide summer roosting and foraging habitat for wildlife including federally listed threatened Northern long-eared bat and Tri color bat. Vehicular traffic on the proposed Marina Way is expected to introduce an additional source of noise for the remaining forest habitats adjacent to the roadway. The new roadway is expected to interfere with wildlife movements of terrestrial animals across the roadway. Although these direct impacts occur, no induced growth is expected because of the alternative. Therefore, the Preferred Alternative would have no indirect effects.

Step 7: Assess Consequence and Develop Mitigation.

The No Build Alternative has no substantial indirect impacts on socioeconomic or wildlife and threatened and endangered species. Therefore, no mitigation is recommended.

Wildlife and Threatened and Endangered Species

To minimize the potential of the establishment of invasive species during construction, the provisions in VDOT's Road and Bridge Specifications will be followed. To prevent the expansion of existing invasive species and to prevent the introduction of new invasive species, best management practices would be followed, including washing machinery before it enters the area, minimizing ground disturbance, and reseeded of disturbed area with seeds that are tested in accordance with the Virginia Seed Law and VDOT's standards and specifications that ensure that seed mixes are free of noxious species.

Cumulative Effects

Cumulative effects are the impacts on the environment resulting from the incremental impact of the action when combined with other past, present, and reasonably foreseeable future actions regardless of what agency (federal or non-federal) or person undertakes such actions. Cumulative effects can result from individually minor but collectively significant actions taking place over a period. The cumulative effects analysis is based on:

1. What is the geographic area affected by the project?
2. What are the resources affected by the project?
3. What are the other past, present, and reasonably foreseeable actions that have impacted these resources?
4. What were those impacts?
5. What is the overall impact on these various resources from the accumulation of the actions?

Geographic Area and Time Span. The geographic limits of the resource specific study areas used for the cumulative effects analysis are the same as those used for the indirect effects analysis. The time span for the analysis is from the mid-1980s (when the development of eastern Prince William County began) to 2050, which is the design year for the project.

Affected Resources. The same resources identified in Section 3 of this report.

Past, Present, and Reasonably Foreseeable Actions. The past, present and reasonably foreseeable future actions that contribute to cumulative effects are described below. The focus of the discussion is North Woodbridge, which encompasses the cumulative study area for social and economic resources and natural resources.

Past Actions:

Prior to World War II, most of the land area in Woodbridge was dedicated to agriculture. The Federal Highway Act of 1956 influenced the growth of North Woodbridge's land development characterized by residential lots, strip malls, and an increased need for cars. Between 1950 and 1960, improvements were made to widen Route 1 between Richmond to Woodbridge. The construction of I-95 in eastern Prince William County, in 1964, contributed to the development of suburbs and self-contained shopping centers including the construction of Gordon Plaza in the early 1970s. Based on historic Google imagery, the park and ride located at 1100 Annapolis Way was constructed in the late 1990s.

More recently, multiple apartment buildings have been constructed in North Woodbridge close to the project area. These new developments include the Rivergate Apartments in 2017, the Viridium Apartments in 2022, and the Landing at Mason's Bridge in 2023.

Present and Reasonably Foreseeable Future Actions

Annapolis Way Extension project has secured funding through the Northern Virginia Transportation Authority in July 2020 (NVTA, 2020). The project is the extension of Annapolis Way to connect the intersections of Annapolis Way and Route 1, and Annapolis Way Route 123.

The Route 1 widening project includes widening Route 1 to six lanes from Mt. Pleasant Drive to the Occoquan River. This project included improvements to the following intersections:

- Route 1 at Occoquan Road/ Dawson Beach Road – Improvements included dual left turns from northbound and southbound Route 1.
- Route 1 at Route 123 - Improvements include the addition of two left turn lanes along Route 1 for the northbound vehicles turning left onto Route 123.
- Route 1 at Annapolis Way – Improvements include two additional left turn lanes along Annapolis Way vehicles turning left onto Route 1.

The Route 1 at Route 123 Interchange project is in the design stage and includes widening of Route 123 as well as intersection improvements to Route 1 at Annapolis Way.

No-Build Alternative

The No-Build Alternative would have a minor adverse cumulative effect on communities, businesses, and the population that lives in the area. The population is expected to grow over the next few decades. This growth is contributed partly to the ever expanding economic and residential development that the County has planned for the area. The growth in the area is expected to put stress on the local roadway network regarding traffic congestion. Under this alternative, the traffic in the North Woodbridge area would continue to worsen which would negatively affect local businesses, residential access, and

commute times. Therefore, the alternative would have negative cumulative effects communities, community cohesion, and EJ populations.

Preferred Alternative

Past and present actions have urbanized the area. Access to communities and businesses has increased through the urbanization but the traffic that has followed the growth has hindered growth in the area due to lowering accessibility and desirability due to traffic. The Preferred Alternative would extend an existing roadway and improve pedestrian facilities in this urban area which in turns improves accessibility to communities and local businesses in an area that has been designated as an EJ community. The Preferred Alternative could have short-term minor adverse effects while the roadway and associated improvements are under construction. The long-term beneficial effect is associated with accessibility and community cohesion for the area.

The Preferred Alternative's impacts to wildlife and threatened and endangered species habitat would contribute to the cumulative effects that have occurred in the past to these resources within the study area. These effects should be minimized by the implementation of best management practices such as implementation of time-of-year restrictions. Construction and post-construction of the Preferred Alternative would potentially contribute to short-term, minor, localized increases in pollutants and nutrients causing impairment to waterways. Since construction of the Preferred Alternative would upgrade and replace current stormwater management systems, implementation of the Preferred Alternative could improve roadway runoff water quality from current conditions.

Past and present actions have affected the current state of socioeconomic, natural, and historic resources within the associated ICE Study Areas, and future actions would continue to affect these resources regardless of this project. The region is already developed, therefore cumulative effects of the Preferred Alternative are expected to be minimal. In addition, current regulatory requirements and planning practices are expected to help avoid or minimize the contribution of present and future actions to adverse cumulative effects for socioeconomic, natural, and historic resources.

Hi Amy,

Based on the scope of the project and my review of available geologic mapping, I do not anticipate a significant impact to mineral or energy resources.

Sincerely,
Matt Heller

Mr. Heller,

Prince William County is proposing the extension of Marina Way from its intersection at Annapolis Way to the Horner Road/Route 123 (Gordon Blvd) intersection. The County requests your review of the project along with any information you may have regarding the resources around the project area. This project will mitigate congestion by reducing traffic delays across multiple intersections and improve vehicular and pedestrian access to proposed Woodbridge Town Center.

Attached is the scoping letter requesting your agency's review and comment.

Sincerely,
Amy Musselman

Project #: N/A

Project Name: JMT - Marina Way Extension Scoping

UPC #: 120778

Location: Prince William County

VDH – Office of Drinking Water has reviewed the above project. Below are our comments as they relate to proximity to **public drinking water sources** (groundwater wells, springs and surface water intakes). Potential impacts to public water distribution systems or sanitary sewage collection systems **must be verified by the local utility.**

The following public groundwater wells are located within a 1-mile radius of the project site:

PWS ID Number	City/County	System Name	Facility Name
6059505	FAIRFAX COUNTY	FAIRFAX YACHT CLUB	FX YACHT CLUB DRILLED WELL

The following surface water intakes are located within a 5-mile radius of the project site:

PWS ID Number	System Name	Facility Name
6059501	FAIRFAX COUNTY WATER AUTHORITY	OCCOQUAN RESERVOIR INTAKE

The project is not within the watershed of any public surface water intakes.

Best Management Practices should be employed, including Erosion & Sedimentation Controls and Spill Prevention Controls & Countermeasures on the project site.

Materials should be managed while on site and during transport to prevent impacts to nearby surface water.

The Virginia Department of Health – Office of Drinking Water appreciates the opportunity to provide comments. If you have any questions, please let me know.

Best Regards,

Arlene F. Warren

Cyber Security Reminder: Please use caution - message originated outside JMT.

Amy,

We have reviewed the Marina Way Extension project. The Occoquan River at the project location is designated an Anadromous Fish Use Stream known to support six different species of anadromous fish. It appears no in-stream work is proposed for the project, therefore we do not anticipate adverse effects upon aquatic resources from the proposed work.

We document multiple Bald Eagle Concentration Areas as well as multiple historic Bald Eagle nests from the project area, but based on the location and scope of the work, we do not anticipate adverse effects upon Bald Eagles from the proposed project.

To minimize the adverse impacts of linear utility/road project development on wildlife resources, we offer the following general recommendations: avoid and minimize impacts to undisturbed forest, wetlands, and streams to the fullest extent practicable; maintain naturally vegetated buffers of at least 100 feet in width around wetlands and on both sides of perennial and intermittent streams, where practicable; conduct significant tree removal and ground clearing activities outside of the primary songbird nesting season of March 15 through August 15; and, implement and maintain appropriate erosion and sediment controls throughout project construction and site restoration. To minimize potential wildlife entanglements resulting from use of synthetic/plastic erosion and sediment control matting, we recommend use of matting made from natural/organic materials such as coir fiber, jute, and/or burlap. We understand that adherence to these general recommendations may be infeasible in some situations. We are happy to work with the applicant to develop project-specific measures as necessary to minimize project impacts upon the Commonwealth's wildlife resources.

The U.S. Fish and Wildlife Service (in Virginia) utilizes an online project review process (<https://www.fws.gov/office/virginia-ecological-services/virginia-field-office-online-review-process>) to facilitate compliance with the Endangered Species Act (16 U.S.C. 1531-1544, 87 Stat. 884) (ESA), as amended. The process enables users to 1) follow step-by-step guidance; 2) access information that will allow them to identify threatened and endangered species, designated critical habitat, and other Federal trust resources that may be affected by their project; and 3) accurately reach determinations regarding the potential effects of their project on these resources as required under the ESA. If you have questions regarding the online review process, please contact Rachel Case at rachel_case@fws.gov.

In addition to the listed species and wildlife resources mentioned above, a number of species designated as Species of Greatest Conservation Need in Virginia's Wildlife Action Plan are likely to occur, if suitable habitat exists, in and around the project area. We recommend that the Virginia Wildlife

Action Plan (available through www.bewildvirginia.gov) be reviewed to determine what threats are known to these species, what constitutes suitable habitat for these species, and how to best protect them and their habitats from harm.

Thank you,

Tamara

Hi Amy,

The Virginia Outdoors Foundation has reviewed the project referenced below. As of March 7, 2024, this project will not encroach on any existing nor proposed VOF open-space easements.

Please contact VOF again for further review if the project area changes or if this project does not begin within 24 months. Thank you for considering conservation easements.

Best,
Baron
